

AMERICAN INSTITUTE OF BIOLOGICAL SCIENCES

We provide and promote equitable peer review processes, with thorough and structured evaluation, performed by independent, qualified experts.

As a mission-based registered nonprofit 501(c)(3) public charity, the *American Institute of Biological Sciences (AIBS)* is focused on promoting the use of science to inform decision-making. AIBS serves a diverse group of clients that focus on a wide variety of scientific research topics.

We have over 5 decades of experience providing review and advisory support services for:

- research proposals and progress reports
- ongoing research programs / portfolios
- retrospective research impact analyses
- advisory board and committees

With our unparalleled staff expertise and experience and our advanced software platforms, AIBS provides robust support for:

- receiving, checking, & tracking materials
- targeted expertise recruitment
- thoroughly vetting conflicts of interest
- structured evaluation setup and management
- virtual and/or in-person meeting facilitation
- technical editing and report preparation
- processing of honoraria and reimbursement

Sample Clients:

- Centers for Disease Control and Prevention
- Doris Duke Charitable Foundation
- Emergency Medicine Foundation
- Flight Attendant Medical Research Institute
- Foundation for Physical Therapy Research
- Gulf of Mexico Research Initiative
- New York Department of Health
- Paralyzed Veterans of America

The Science of Peer Review: Our services are elevated through our in-house research and meta-analyses on peer review that our staff share with the community through publications and presentations.

Our work not only benefits and informs research program decisions, it also strengthens the integrity of the science that will benefit society.

AIBS is a *valued partner in science*[®] / www.aibs.org
